

FOR IMMEDIATE RELEASE

Edaphix® , LLC and Ferguson Waterworks Join Together to provide Long-Lasting Soil Restoration and Erosion Control Solutions in Colorado and Wyoming

Expanding the Reach of NutraFix®, a Sustainable Fertilizer Solution, to the Rocky Mountain Region and Beyond

March 7, 2025 – Bozeman, MT – Edaphix, LLC, an innovative leader in sustainable soil health solutions is pleased to announce its new collaboration with Ferguson Waterworks, a leading distributor of soil health, erosion control, and stormwater solutions. This strategic alliance will enhance the marketing, sales, and distribution of Edaphix's NutraFix® 1-4-1 fertilizer product throughout Colorado and Wyoming. In this alliance, Ferguson Waterworks will leverage its extensive network of distribution channels and strong relationships in Colorado and Wyoming to ensure municipal land managers, engineers, and environmental professionals have a reliable, long-lasting solution for soil restoration, erosion control, and native plant growth.

NutraFix 1-4-1 is a specially formulated fertilizer derived from naturally occurring minerals. NutraFix activates soil health using full-spectrum micronutrient additions to promote vigorous growth of native plants and restoration of degraded soil. NutraFix applications are long-lasting and restore natural nutrient cycling by deep-rooted perennial plants and improve dormant seed germination. Edaphix's innovative product is part of the company's ongoing mission to provide sustainable solutions for long term erosion control, fire prevention, increased biodiversity, and thriving ecosystems that meet the growing demand for both effective and environmentally responsible soil health tools.

Ferguson Waterworks, a division of Ferguson, is committed to providing high-quality products and exceptional service to the geo- and stormwater market sectors. With this collaboration, Ferguson's established customer base in Colorado, Wyoming, and emerging markets throughout the United States will now have greater access to NutraFix.

"We're excited to join forces with Ferguson Waterworks to bring NutraFix to the vegetation management and land restoration sectors in Colorado and Wyoming," said Stuart Jennings, President and Founder of Edaphix, LLC. "Ferguson Waterworks has an outstanding reputation for providing quality products and exceptional service. Together, we will continue to promote soil health by offering NutraFix as another superior solution".

"We are excited to collaborate with Edaphix to offer NutraFix to our customers. Adding NutraFix to our suite of product solutions is another example of our commitment to protect natural resources with sustainable solutions," said Chris Bogdan, OUR Brand Manager, at Ferguson Waterworks. "This partnership compliments and expands our product offerings in the soil health and sustainable revegetation space. While our initial efforts will be focused in the Rocky Mountain Region, our goal is to make NutraFix available nationwide to help our customers achieve greater efficiency and success in their projects."

The collaboration between Edaphix and Ferguson Waterworks marks a significant step in advancing the availability of sustainable fertilizer solutions in Colorado and Wyoming. By combining Edaphix's innovative product with Ferguson's trusted marketing, sales and distribution network, the strategic alliance will foster greater adoption of NutraFix, contributing to healthier soils, and a greener future for the region.
